ESTABLISHED AND TENTATIVE SOIL SERIES OF THE
UNITED STATES

List compiled in Office of Director,
Soil Classification and Correlation,
Soil Conservation Service

United States Department of Agriculture
Soil Conservation Service

Issued
August, 1961

EXPLANATORY NOTES

The names of tentative series are preceded by an asterisk whereas no mark precedes the names of established series in the list.

A numeral follows the name of the series, except in a few instances. The names of series established in a reconnaissance survey of the Panama Canal Zone are followed by the letters CZ. Otherwise, each series name is followed by a numeral to identify the region of major occurrence of the series in the country. These regions are five major correlation territories designated as follows:

1. Northeastern States
(Connecticut, Delaware, Maryland, Massachusetts, Maine, New Hampshire, New Jersey, New York, Pennsylvania, Rhode Island, Vermont, West Virginia)
2. Southern States
(Alabama, Arkansas, Florida, Georgia, Kentucky, Louisiana, Mississippi, North Carolina, South Carolina, Tennessee, Virginia. Also included are Puerto Rico and the Virgin Islands)
3. North Central States
(Alaska, Illinois, Indiana, Iowa, Michigan, Minnesota, Missouri, Ohio, Wisconsin)
4. Great Plains States
(Colorado, Kansas, Montana, New Mexico, North Dakota, South Dakota, Nebraska, Oklahoma, Texas, Wyoming)
5. Western States
(Arizona, California, Hawaii, Idaho, Nevada, Oregon, Utah, Washington)
